

FOR IMMEDIATE RELEASE

Prytime Medical Devices Introduces the ER-REBOA™ Convenience Kit

Enabling Convenient ER-REBOA™ Application

San Antonio, TX – March 01, 2017 –Prytime Medical is pleased to announce the launch of the ER-REBOA™ Catheter Convenience Kit. The Convenience Kit encourages best practice by providing all additional components required to perform a safe and effective REBOA (Resuscitative Endovascular Occlusion of the Aorta) procedure.

The ER-REBOA™ Catheter Convenience Kit is designed to enable immediate and convenient utilization of the ER-REBOA™ Catheter in the emergency and critical care environment while assisting hospitals with standardization of inventory.

The ER-REBOA™ Convenience Kit is compatible with the ER-REBOA™ Catheter and provides clinicians with the components needed for gaining access, placement and fixation of the ER-REBOA™ Catheter. Designed for safety and convenience, the kit includes:

- (1) Introducer Sheath Kit, 7 Fr W/ .035" Short Guidewire
- (1) Needle, 18 Ga x 7 cm, Echogenic
- (1) Saline, 50 ml 0.9%
- (1) Syringe, 30 cc
- (1) 5 Fr Clamp
- (1) Scalpel, #11 SS
- (1) Suture, Nylon 30" 2-0, Reverse Cutting

NOTE: The ER-REBOA™ Catheter Convenience Kit is packaged separately from the ER-REBOA™ Catheter. It is designed to be used in conjunction with the ER-REBOA™ Catheter.

About REBOA

REBOA (Resuscitative Endovascular Occlusion of the Aorta) is a minimally invasive technique to temporarily occlude large vessels by using a balloon catheter. Leading trauma centers across the US are adopting REBOA as a vital temporizing adjunct to control hemorrhage, which has been identified as the number one cause of potentially survivable death in the surgical, emergency, and critical care environment.
